# We aim to improve people's Quality of Life through sustainable management.

## Digital Solutions Business and Sustainability

The United Nations has adopted 17 Sustainable Development Goals (SDGs) to be achieved by 2030, including goals for ending poverty, fighting inequality and injustice, and tackling climate change. As members of the Hitachi Group, we are powerfully promoting the digital solutions business under the corporate philosophy of "Create a bright future for the global community collectively with reliable technologies and advanced solutions".

Our business creates new economic, social and environmental value, while also reducing negative impacts on society and the environment.

Hitachi Solutions received a 4.5-star rating in the FY2025 Nikkei Sustainable Management Survey, Smart Work Edition.

## Agricultural Innovation through Collaboration

In cooperation with an Indian IT company, Hitachi Group has pooled its resources to provide an agricultural harvest forecasting and damage assessment system that utilizes remote sensing and geospatial technology. This makes it easier to change cropping patterns, etc. and is contributing to improving productivity and increasing farm incomes.

## Security to Support a Safe and Secure Digital Society

In the modern digital society, security risks represent threats to society overall. We support realization of a safe and secure society through measures ranging from prevention of information leaks to countermeasures for addressing cyber attacks and vulnerabilities.

farm incomes.

## Major Initiatives through the Digital Solutions Business

## Passing on Expert Technology through AI Image Recognition

We provide a system that utilizes AI technology to conduct image recognition and automate the visual inspection of components. Through stabilizing the quality of products irrespective of the skill level of engineers, we contribute towards resolving issues in inheritance of expert technology in manufacturing.

## Workstyle Innovation

We powerfully support reform of corporate work through realizing diverse work styles and promoting automation and greater efficiency through RPA and so on. Also, utilizing human resources data, work logs, organizational surveys and so forth, we contribute towards balancing individual happiness with organizational growth.

## Safe and Convenient Sophisticated Road Traffic System

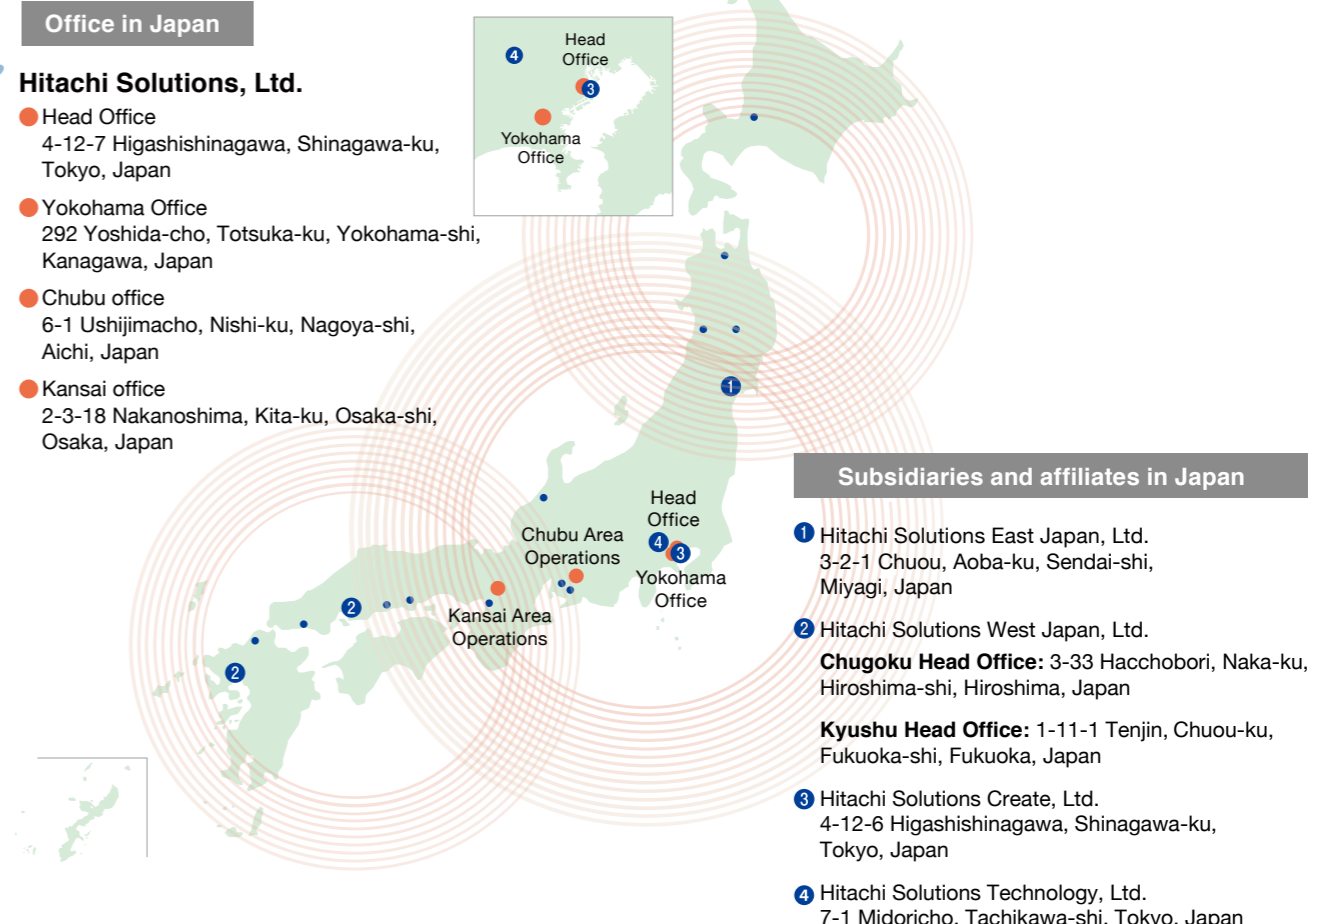

We have developed car-to-car communications middleware platform technology that gathers and analyzes information surrounding automobiles and provides information useful for supporting driving. We are striving to realize driving support that enhances automobile safety and environmental friendliness.

## Making Waves on the Global Stage. Hitachi Solutions "Team AURORA"

As a sport representing Hitachi Solutions, the entire company is behind our team, "AURORA", and we have established an environment in which talented athletes with disabilities can devote themselves to the sport. In November 2004, Hitachi Solutions established the ski team for athletes with disabilities, and its subsequent achievements have included claiming medals at five consecutive Paralympics. In April 2014, we established a new "wheelchair track and field division". This is expanding its activities as a comprehensive para-sports team for players with disabilities, aiming to be active in both the summer and winter Paralympics.

# We will support your business worldwide.

As a core company driving the digital business of the Hitachi Group, we provide a variety of solutions globally to support social lifestyles and corporate activities.

Since our founding, we have regarded our employees as our most valuable management resource and have focused on human capital management, well-being, and human resources development. We also promote data-driven business operations utilizing data and AI, striving to achieve sustainable management.

Furthermore, we have established bases in Europe, the United States, Southeast Asia, and India, collaborating with partners worldwide to develop solutions incorporating cutting-edge digital technologies and best practices.

Recently, the world has been facing frequent natural disasters, resource depletion, global geopolitical risks, as well as new risks accompanying the digitization of social infrastructure, such as cyberattacks and AI ethics. In such an uncertain business environment, companies are required to adapt flexibly to changes and achieve sustainable value improvement.

Under the vision of "Deliver new perspective of globalization and digitalization to all." the Hitachi Solutions Group will continue to devote all its resources to ensure that people can live comfortably, constantly create new value, and fulfill its corporate social responsibility. We aim to contribute to the realization of a sustainable society 50 or even 100 years into the future.

We look forward to your continued support and guidance.

Hideji Morita  
President and Chief Executive Officer

### Hitachi Solutions Corporate Philosophy

Look forward and spearhead change.  
Create a bright future for the global community collectively  
with reliable technologies and advanced solutions.

### Management Vision

Deliver new perspective of globalization and digitalization to all.

Accelerate collaboration that inspires revolution. Build societies in which new values can be enjoyed by everyone.

### Harmony, Sincerity and a Pioneering Spirit

Hitachi was founded on the concept of Harmony, Sincerity and a Pioneering Spirit. Hitachi Solutions also, as part of the Hitachi Group, has taken up this founding spirit to embrace the spirit of cooperating with each other and adopting a sincere approach to all of our business activities. Hitachi Solutions aims to continue to challenge new boundaries and keep moving forward to establish itself as a global leader in new fields of technology and to foster the development of state-of-the-art technologies, know-how and deliver results in a broad range of fields.
